Abstract of the Disclosure:

In a dielectric material for a plasma display panel including 80-100 mass% glass powder and 0-20 mass% ceramic powder, the glass powder consists essentially of, in mass percent, 3-25% BaO, 25-60% ZnO, 15-35% B_2O_3 , 3-30% SiO_2 , 0.2-6% Li_2O_3 , and 0-1.5% Al_2O_3 .
